Subject: Boeing Airplane Services Component Repair Supplier Approval Listing.

Dear Gary Fortner VP Quality,

A quality system audit was completed at your facility on 04/24/2001, including a review of any special capabilities necessary to perform repair, maintenance or overhaul services for Boeing Airplane Services ("BAS"). The results of the audit indicate that your company has the facilities, equipment, personnel, and procedures capable of contract compliance; therefore, your facility will be listed as approved for Boeing procurement of the following services: component repair parts.

This office must be notified promptly of any subsequent change(s) in personnel with primary responsibility for the quality function within your company, or any changes to your air agency certificate(s) or its limitations issued by cognizant regulatory agencies. Boeing listing of your facility obligates you to permit entry of the assigned BAS representative(s) to all areas and records required for audit purposes.

This letter does not approve your facility for manufacturing under Boeing's Production Certificate, nor does it include or imply any authorization to perform the special processes controlled by Boeing Document D1-4426. Separate qualification and approval is required when Boeing specifies processes controlled by Document D1-4426.

The retention of this approval is contingent upon continued compliance with applicable BAS requirements. This approval does not constitute a waiver of any inspections, tests, or other requirements of the contract, nor does it guarantee acceptance of the contracted services performed. This letter may not be reproduced for advertising or sales purposes, nor may this letter be used in the performance of any service for any customer or individual other than BAS without Boeing's prior written consent.

Questions regarding the continued approval listing of your facility should be directed to the undersigned.

Sincerely,

Ronald E Carstensen
Repair Supplier Compliance
